Our Schein app – fits exactly

From accurate sizing up to the selection of all available shoe models our app supports you during your daily counseling.

Let the app calculate

Enter the foot measurements of your patient, and if necessary the thickness of the foot orthotic, and our app calculates the matching type of last.

Check the availability and use our filter functions

For checking the availability you have to enter your personal code: **scheinonline#YourCustomerID**

The function can be switched on and off via settings at any time.

Low data volume

The required data volume for the download will only be 80 MB. The remaining area will be used offline. Only for the e-mail order and the availability indicator online access is needed again.

Turn the wheel

In addition to the Schein app there is our hub for my generation with all dimensions of the lasts in practical overview. With overhead marker and prefabricated tag - for hanging in your measuring cabin.
